

Special Issue

11TH CONFERENCE ON CLOUDS AND PRECIPITATION

Edited by
A. WALDVOGEL
ETH, Zürich, Switzerland

CONTENTS

Part I (Vol. 32/1-4)

| | |
|---|-----|
| Preface | ix |
| <i>Microphysics (Chapter 1)</i> | |
| On the symmetry of snow dendrites | |
| J. Hallett and C. Knight | 1 |
| Initiation of ice: comparison of numerical model results with observations of ice development in a cumulus cloud | |
| J.L. Stith, D.A. Burrows and P.J. DeMott | 13 |
| Surface microphysical mechanism for ice crystal growth habit development | |
| N. Fukuta and Q.J. Lu | 31 |
| Ice particle generation during evaporation | |
| Y. Dong, R.G. Oraltay and J. Hallett..... | 45 |
| Requisites of graupel formation in snow clouds over the Sea of Japan | |
| T. Matsuo, H. Mizuno, M. Murakami and Y. Yamada..... | 55 |
| Preliminary investigation of convective heat transfer of hailstone models | |
| G. Zheng and R. List..... | 75 |
| Hailstone heat and mass transfer theory and three-component Nusselt numbers | |
| R. List..... | 85 |
| Stochastic models of ice accretion | |
| F. Prodi, E. Smargiassi and F. Porcù | 95 |
| Microstructure of cirrus clouds observed by HYVIS | |
| H. Mizuno, T. Matsuo, M. Murakami and Y. Yamada..... | 115 |
| Small crystals in cirriform clouds: A case study of residue size distribution, cloud water content and related cloud properties | |
| J. Ström, J. Heintzenberg, K.J. Noone, K.B. Noone, J.A. Ogren, F. Albers and M. Quante | 125 |
| A study of bimodal droplet size distributions in stratiform clouds | |
| A.V. Korolev | 143 |
| Theoretical collision efficiencies for riming and aerosol impaction | |
| J.P. Böhm | 171 |
| A simple droplet spectrum derived from entropy theory | |
| X. Zhang and G. Zheng..... | 189 |
| Experimental modelling of the Arctic steam fogs | |
| N.K. Didenko, Y.N. Ivanov, Yu.A. Puzov and V.V. Smirnov | 195 |
| <i>Chemistry (Chapter 2)</i> | |
| The influence of riming and frontal dynamics on winter precipitation chemistry in level terrain | |
| S.S.N. Devulapalli and J.L. Collett, Jr. | 203 |

| | |
|--|-----|
| The influence of entrainment-induced variability of cloud microphysics on the chemical composition of cloudwater C.J. Walcek and E. Brankov..... | 215 |
| A 2-D spectral model simulation of the scavenging of gaseous and particulate sulfate by a warm marine cloud A.I. Flossmann | 233 |
| A numerical study on the influence of different cloud treatment in a chemical transport model on gas phase distribution N. Mölders and M. Laube | 249 |
| Case study on the interaction of size dependent multiphase chemistry and detailed microphysics F. Müller and G. Mauersberger..... | 273 |
| Electron microscope analyses of insoluble components in acid rain, Guilin City, China Z. Zheng and C.Y. Hong | 289 |
| A study of acid precipitation in the oceanic environment of Xiamen Island S. Yu, Z. Cheng, X. Cai, X. Cheng and W. Shong | 297 |

Part II (Vol. 33/1-4)

Convective Clouds (Chapter 3)

| | |
|---|-----|
| An aircraft study of rapid precipitation development and electrification in a growing convective cloud P.T. Willis, J. Hallett, R.A. Black and W. Hendricks | 1 |
| Observations of microphysical evolution in a High Plains thunderstorm anvil A.G. Detwiler, P.L. Smith, J.L. Stith and D.A. Burrows..... | 25 |
| Simultaneous polarization and Doppler observations of severe convective storms in central Alberta A.R. Holt, P.I. Joe, R. McGuinness, E. Torlaschi, T. Nichols, F. Bergwall and D.A. Holland | 37 |
| Hailstone size distributions in southwestern France J. Dessens and R. Fraile | 57 |
| Study of a convective storm series and of precipitated hail in south Argentina L. Levi, L. Lubart and J. Lässig | 75 |
| A study of microphysical processes in the 2 August 1981 CCOPE supercell storm D.E. Johnson, P.K. Wang and J.M. Straka | 93 |
| On vortex formation in multicell convective clouds in a shear-free environment A. Shapiro and Y.L. Kogan..... | 125 |

Models (Chapter 4)

| | |
|---|-----|
| The effect of CCN regeneration on the evolution of stratocumulus cloud layers Y.L. Kogan, D.K. Lilly, Z.N. Kogan and V.V. Filyushkin | 137 |
| Concerning primary ice nuclei concentrations and water supersaturations in the atmosphere D.C. Rogers, P.J. DeMott and L.O. Grant | 151 |
| Modeling the trade cumulus boundary layer S.K. Krueger and A. Bergeron..... | 169 |
| A parameterization of warm cloud microphysical conversion processes K.D. Beheng | 193 |
| An explicit cloud microphysics/LES model designed to simulate the Twomey effect G. Feingold, B. Stevens, W.R. Cotton and R.L. Walko..... | 207 |
| Characteristics of convection over the Arabian Sea during a period of monsoon onset G.V. Rao and A. Aksakal | 235 |
| Vertical transport of passive tracers by midlatitude thunderstorms: A 3-D modeling study R.R. Alheit and T. Hauf..... | 259 |
| A three-dimensional atmospheric radiative transfer model based on the discrete-ordinates method A. Sánchez, T.F. Smith and W.F. Krajewski..... | 283 |

| | |
|--|-----|
| A comparative study on hailstone trajectories using different motion equations, drag coefficients and wind fields N.E. Castellano, C.M. Scavuzzo, O.B. Nasello, G.M. Caranti and L. Levi..... | 309 |
| Numerical studies of dynamics and cloud microphysics of the frontal rainbands A.M. Pirnach and S.V. Krakovskaya | 333 |
| Analysis to numerical simulation of the optimal droplet spectrum scale of seeding water-abundant warm clouds R.S. Chen..... | 367 |

Part III (Vol. 34/1-4)

Observations (Chapter 5)

| | |
|--|-----|
| Aircraft measurements to validate and improve numerical model parametrisations of ice to water ratios in clouds S.J. Moss and D.W. Johnson..... | 1 |
| Measurements of the radiative and microphysical properties of stratocumulus over the South Atlantic and around the British Isles J.P. Taylor | 27 |
| Microphysical and radiative development of a cirrus cloud during FIRE: implications for dynamical effects I. Gultepe and D.O'C. Starr | 43 |
| Tropical high cloud characteristics derived from SAGE II extinction measurements P.-H. Wang, M.P. McCormick, L.R. Poole, W.P. Chu, G.K. Yue, G.S. Kent and K.M. Skeens | 53 |
| Remote sensing the susceptibility of cloud albedo to changes in drop concentration S. Platnick and S. Twomey | 85 |
| Microphysical characteristics of a marine stratiform cloud obtained from lidar and in situ measurements J.-F. Gayet, G. Febvre, G. Brogniez and P. Moerl..... | 99 |
| Vertical distribution of clouds over Hampton, Virginia observed by lidar under the ECLIPS and FIRE ETO programs D.M. Winker and M.A. Vaughan | 117 |
| 95 GHz polarimetric radar measurements in a cloud compared with model computations K. Aydin, C. Tang, A. Pazmany, J. Mead, R. McIntosh, M. Hervig, R. Kelly and G. Vali | 135 |
| Remote sensing of liquid water content with combined radar-radiometer system J. Liu and L. Zhang | 145 |
| Winter precipitation variability over European Russia in different types of fronts originated over Arctic, Atlantic and Mediterranean regions N.A. Bezrukova | 153 |
| The origin and evolution of dust clouds in Central Asia V.V. Smirnov, D.A. Gillette, G.S. Golitsyn and D.J. MacKinnon..... | 169 |

Techniques (Chapter 6)

| | |
|--|-----|
| Identification of icing water clouds by NOAA AVHRR satellite data K.P. Schickel, H.E. Hoffmann and K.T. Kriebel..... | 177 |
| Computer assisted aircraft icing forecast: progress and experiences W. Fuchs and K. P. Schickel | 185 |
| 2D image population analysis C. Duroure, H.R. Larsen, H. Isaka and P. Personne | 195 |
| Corrections to empirical relations derived from rainfall disdrometer data for effects due to drop size distribution truncation C.W. Ulbrich | 207 |
| On correlation, with applications to the radar and raingage measurement of rainfall E. Kessler and B. Neas | 217 |

| | |
|---|-----|
| Investigation of relationships between Ka-band radar reflectivity and ice and liquid water contents | |
| L. Liao and K. Sassen | 231 |
| Radar imagery nowcasting using adaptive stochastic models | |
| A.V. Belotsercovsky, H. Uyeda and K. Kikuchi | 249 |
| Retrieving microphysical properties near the tops of potential rain clouds by multispectral analysis of AVHRR data | |
| D. Rosenfeld and G. Gutman | 259 |
| Satellite estimation of the tropical precipitation using the METEOSAT and SSM/I data | |
| I. Jobard and M. Desbois | 285 |
| On the limitation of using asymmetry factor for radiative transfer involving cirrus clouds | |
| Q. Fu and Y. Takano..... | 299 |
| A universal regression retrieval method of the ground-based microwave remote sensing of precipitable water vapor and path-integrated cloud liquid water content | |
| C. Wei and D. Lu..... | 309 |
| <i>Instrumentation (Chapter 7)</i> | |
| Lidar-acoustic sensing of clouds | |
| A.J. Palmer | 323 |
| Retrieval of hydrometeor distributions over the ocean from airborne single-frequency radar and multi-frequency radiometric measurements | |
| J.L. Schols and J.A. Weinman..... | 329 |
| Spectral imaging of clouds using a digital array scanned interferometer | |
| P.D. Hammer, F.P.J. Valero and W.H. Smith..... | 347 |
| The pluvispectrometer: classification of falling hydrometeors via digital image processing | |
| G. Frank, T. Härtl and J. Tschiersch | 367 |
| Error analysis of GBPP-100 probe | |
| L. Yangang and Y. Laiguang..... | 379 |
